    - ❖ Average of 30 cases/day
- Concern for rapid spread at congregated facilities.
- Cross-jurisdictional coordination with Umatilla County, OR, Benton/Franklin County, WA.
- Need to continue to monitor for behavioral health issues.
- Cold/flu season; respiratory symptoms may be confused with COVID and require workers to stay home.
- 'COVID fatigue' is very high with additional challenges presented by winter; more time inside, less daylight and sunshine, etc. Need to focus on community resilience.

There is frustration that locals did not get to have input into the regionalization decision.**
- Concerns about compilation of testing results at the state level. With the lag in negative test results- it is very difficult to see where our county is in real time and ultimately impacts the county's ability to advance in the Healthy Washington phasing.
